FOR IMMEDIATE RELEASE
15 March 2007

**Cimmetry introduces AutoVue 3d Pro – SME,
providing cost-effective native visualization for
SolidWorks, Inventor, AutoCAD Mechanical and Solid Edge**

Cimmetry Delivers AutoVue 3D Pro - SME for Small and Medium-Sized Enterprises

Allied Images, a Cimmetry Certified Partner, is pleased to announce the immediate availability of AutoVue 3D Pro – SME, the latest addition to Cimmetry's AutoVue family of visualisation solutions, targeting the small and medium sized enterprise (SME) market.

Strong demand for Cimmetry's native viewing technology has created the need to recognize the special requirements of small and medium sized enterprises and their tendency to work with the lower priced, mid-range 3D CAD packages. Cimmetry's new AutoVue 3D Pro – SME provides users of mid-range 3D CAD packages, such as SolidWorks, Autodesk Inventor, AutoCAD Mechanical and Solid Edge, with the freedom to choose their authoring tools and still work with different mid-range 3D formats from partners, customers or suppliers.

Customers that require the ability to view the higher-end 3D CAD packages, such as CATIA, NX or Pro/Engineer, may upgrade to the AutoVue SolidModel Pro product. AutoVue 3D Pro – SME features powerful native document viewing, markup, printing, stamping and collaboration capabilities for the leading mid-range 3D CAD packages, as well as leading 2D CAD tools, providing users with the ability to quickly view documents without requiring authoring applications or undergoing costly and error prone file conversions with publishing systems.

AutoVue 3D Pro – SME version 19.1 is available in both a Desktop and Web Edition and can be purchased from Allied Images. For sales enquiries visit email sales@allied-images.com or call 01604 670679.
