FOR IMMEDIATE RELEASE
26 September 2006

CIMMETRY RELEASES AUTOVUE 19

Setting the Standard for Collaborative Visualization

Cimmetry Systems Corporation, an Agile Software Corporation company, today announced the immediate availability of AutoVue version 19. This feature-packed release expands AutoVue's position as the collaborative visualization leader for the industrial, automotive, aerospace and defense, electronics and high tech, medical device, and AEC markets.

"In the latest release of AutoVue 19, Cimmetry continues to extend its competitive advantage with an advanced architecture that accesses native files for CAD geometry, object level attributes, and product structure," said Ken Versprille, Ph.D., Principle and PLM Research Director of Collaborative Product Development Associates, LLC (CPDA). "AutoVue's powerful new 3D assembly comparison and search capabilities, as well as ECAD usability enhancements, target the needs of engineering intensive industries, including automotive, aerospace, AEC, and high tech."

AutoVue's comprehensive collaborative visualization solution provides all users, regardless of role in the organization or geographic location, with the ability to natively view and markup multi-format document data. AutoVue's strength lies in its ability to integrate seamlessly with multiple enterprise systems of record to provide secure and reliable collaborative visualization.

Extending the Lead in MCAD Collaborative Visualization

As manufactured goods become increasingly complex, AutoVue's new capabilities in 3D exploded view manipulation, assembly comparison and advanced search provide process planners, illustrators, shop personnel and designers with powerful yet easy-to-use tools to view and collaborate on product information faster and more efficiently. Manufacturing information including dimensional constraints, geometric tolerances, process notes and work instructions can also be read from or captured with the model to drive elimination of paper-based processes on the shop floor.

AutoVue's unique 3D compare functionality goes beyond simple graphical evaluation, enabling users to detect non-graphical file properties at the assembly or part level. Dynamic assembly explosion and advanced

search functionality deliver component results quickly and reliably. With AutoVue 19, users at all levels of design expertise have the ability to drill down to critical MCAD design attributes from a single interface.

High Tech Manufacturing

Full collaborative visualization support has been added in this release for several key manufacturing formats including Gerber, ODB++ and EDIF, offering high tech companies with outsourced manufacturing the same capabilities as design teams. New minimum distance measurement tools, improved board entity viewing functionality and multi-page BOM generation capabilities further enhance EDA usability, improving the experience of electronics designers, testers and contract manufacturers.

“With this release, Cimmetry extends its product leadership by providing unsurpassed engineering and desktop format support coupled with ready-made integration capability for widely used PLM, ERP and document management systems,” said Paul Giaconia, President of Cimmetry Systems. “The result is a single, cost-effective solution for our customers that eliminates the proliferation of tools required to support hundreds of document types, is easy to deploy and learn, and fits into the existing enterprise IT solutions common in our customers’ industries.”

“Visualization is an essential part of the Synergis Adept data management solution,” said Joseph T. Gasper, director of Adept Technical Services at Synergis Software. “Cimmetry continues to add value to Adept with its support of the most popular CAD and non-CAD file formats, while adding new features such as 3D compare and explode, which provide our customers tremendous functionality.”

“AutoVue 19 support for both AutoCAD 2006 and MicroStation v8 on the CAD side and Acrobat 7 on the office side, is *exactly* what customers have been asking us for,” said Lloyd Charlier, Chief Executive Officer at SpatiaX Infosystems. “Armed with this broadened coverage, SpatiaX’s DMS-enabled collaboration solution, sxMARKUP-Web, can better address the needs of our existing and prospective customers.”

Availability

AutoVue 19 can be purchased from Allied Images a Cimmetry Value Added Reseller. To learn more about AutoVue 19’s new features and functionality, visit: <http://www.cimmetry.com/autovue19.html>. For a complete list of formats supported by AutoVue, visit: <http://www.cimmetry.com/formats.html>. Download a fully functional demonstration copy, try an online demo, or schedule a real-time collaboration meeting using AutoVue at www.cimmetry.com.

Notes for Editors:

About Allied Images Limited

Allied Images Limited has been established since 1989 and are Scanning and Imaging Technology Specialists offering a comprehensive range of products and services to an extensive market place including GIS, CAD, AEC, Reprographics, Copy Shops, Bureaux and Manufacturing. Allied Images is committed to stay in the forefront of this continually expanding industry enabling it to satisfy users demands with the latest technology and training available. www.allied-images.com

About Cimmetry

Cimmetry Systems Corporation, an Agile Software company, is global leader in collaborative visualisation solutions for the industrial, automotive, aerospace and defence, electronics and high tech, medical device and AEC markets. AutoVue is the premier enterprise-wide viewing, printing, markup, digital mockup and collaboration solution, and supports hundreds of native 2D/3D CAD & EDA formats, Office, PDF documents and graphics.

Ready-made connectivity for integrated collaborative visualisation is available with Document Management (DM), Product Lifecycle Management (PLM) and Enterprise Resource Planning (ERP) systems including Agile© PLM, Documentum eRoom, FileNet, Hummingbird, Lotus Notes/Domino, MatirxOne, Open text, SAP and SmarTeam.

Cimmetry is a wholly-owned subsidiary of Agile Software Corporation (NASDAQ: AGIL), a leading provider of product lifecycle management (PLM) solutions. www.cimmetry.com
