FOR IMMEDIATE RELEASE

16 November 2006

Allied Images CopyStation MFP

Allied Images is pleased to announce the availability of its new state of the art technology CopyStation MFP for FM, CAD/GIS, Reprographics and full colour graphics up to 42" width. The CopyStation family of large format multi function systems provides maximum flexibility for your scanning, copying and printing needs. CopyStation MFP gives a new benchmark in speed, quality and ease-of-use in a single, compact footprint.

CopyStation allows you either to Scan, Copy or Print from the same system. You can make single or multiple copies of large format documents from a single scan. Your copies may be full-size, or, enlargements or reductions of up to 1000%. Also, you can use the scanner and printer independently to scan full-size documents to file capturing images in colour, greyscale or monochrome, while printing documents up to 42" wide. CopyStation is ideal for architectural / mechanical designs and renderings, project presentations, maps, land usage and many more.

CopyStation is available in two models. CopyStation Cx is based on SmartLF Cx 40c CIS scanner and a Mutoh RJ-900 printer and is ideal for full colour CAD and GIS application. CopyStation Gx is based on SmartLF Gx40c CCD scanner and a Mutoh RJ-900 printer and is ideal for the full colour world of photography, advertising and graphic arts.

Steve Morin MD of Allied Images said, "Allied has been selling scanning and imaging solutions for almost 18 years. Adding Mutoh's DrafStation to our product range has allowed us to provide an end-to-end scan-to-print and fully-featured digital copy solutions for documents up to 42" width. CopyStation provides exceptional image quality and best in class print speeds at what we believe is an exceptional price."
