**FOR IMMEDIATE RELEASE**  
**09 April 2008**

### **New Teriostar printers offer high speed printing with low total cost of ownership**

Allied Images today announced UK distribution of the 6th generation of LED wide-format Teriostar™

printers from Seiko I Infotech. These precision engineered monochrome printers and multi-functions come in two state-of-the-art models; a network printer model with two roll support (LP-1020L-2R), and a multi-function scanner/copier/printer model with either single roll (LP-1020S-MF-1R) or two roll support (LP-1020L MF-2R). Supplied with a monochrome scanner, the LP-1020L-MF-2R offers a colour scanner as an option. The color scanner offers the possibility of printing to the monochrome printer or a colour ink jet printer. Both models are highly suited to CAD, GIS, AEC and copy shop applications.

Each model boasts high output speed, printing 3.6 A0 ppm in page mode (4.8 metres per minute in a continuous print) at a true optical resolution of 600dpi. These Teriostar printers are optimized for 600 dpi, high-density output and you can really see the difference. They deliver super-accurate line acuity, deep, rich black lines/fills and excellent readability of extremely small text.

Additionally, both models feature a small footprint allowing users the added convenience of a front feed system and ejection all in one small space. Moreover, the Teriostar family uses the 'first ever' user-replaceable process cartridge in a wide format printer. With this newly developed technology, end-users can replace their process cartridge just like in a desktop laser printer without the expense or delays of a service call. Collectively, the Teriostar offers the best value, quality, and speed in its class.

Steve Morin, MD of Allied Images said "even though these printers use advanced technologies to deliver industry leading speed, image density and quality, our costs per square foot are low and product reliability is high. Also, genuine Seiko toner and parts are competitively priced so users will get maximum printing and scanning without paying more in the short or long run."

The new printers are available to ship by May 2008.

/Ends

#### **Notes for Editors:**

##### **About Allied Images**

Allied Images is a large format scanning and printing solutions distributor providing a high level of quality products and services throughout the UK. Allied Images has clients in engineering, architecture, construction, manufacturing, advertising, reprographics and document management, as well as numerous public agencies at all levels of local and central government. Since 1989, Allied Images has grown to be a leading supplier of large format scanning and printing solutions. For more information on our business solutions please call us on 01604 670679, email us at [info@allied-images.com](mailto:info@allied-images.com) or visit [www.allied-images.com](http://www.allied-images.com).

##### **About Seiko I Infotech**

Seiko I Infotech Inc. is leading company in wide-format printing technology, and is a subsidiary company of Seiko Instruments Inc., headquartered in Chiba, Japan. SIIT develops and manufactures precision-engineered wide format printing systems specifically for the sign, graphics, CAD, and GIS markets that provide industry leading productivity and image quality. SIIT and its worldwide network of authorized distributors and dealers, provide complete printing solutions including wide-format printers, inks, media, software, installation, support, knowledge and training. More information about SIIT and SIIT products is available at [www.seiko-i.com](http://www.seiko-i.com).
