## **CIMMETRY RELEASES AUTOVUE VISUALIZATION SOLUTIONS FOR THE ELECTRONICS AND HIGH TECH DESIGN AND MANUFACTURING MARKETS**

### **AutoVue 19.2 Reinforces Cimmetry's Lead in MCAD and A/E/C Visualization**

Cimmetry Systems, a global leader in enterprise visualization solutions and a subsidiary of Agile Software Corporation, which was recently acquired by Oracle Corporation, today announced the immediate availability of AutoVue v.19.2. Release 19.2 solidifies Cimmetry's presence in the Electronics and High Tech market with new EDA centric product offerings to address the specific requirements of Printed Circuit Board design and contract manufacturing. Several industry leading Electronics and High Tech companies worked in close collaboration with Cimmetry Systems to drive AutoVue's EDA capability in release 19.2.

*"At Harris we work with a variety of high level design tools and require a way to view and collaborate on these documents both internally and externally with our customers and partners. Cimmetry understands our needs, and is working closely with our team to deliver an enterprise visualization solution that will serve the specific requirements of all companies involved in EDA," explains Charlie Davies, Principal ECAE Application Engineer, Harris Corporation, Government Communications Systems Division. "AutoVue 19.2 is a major advancement for viewing, reviewing and collaborating on EDA files, and we are confident it will deliver significant improvements across our enterprise."*

New AutoVue product offerings for the EDA marketplace include:

- AutoVue EDA Professional features native viewing, markup and secure real-time collaboration capabilities via the web for manufacturing documents, PCB layouts, schematics and Office documents. New supported formats include CADSTAR 8.0, Mentor Board Station 8.10, Altium Designer 6.0, 6.3, 6.4, 6.5, and many more. To learn more, please visit <http://www.allied-images.com/avedapro.html>

- AutoVue Electro-Mechanical Professional, Cimmetry's most complete solution, provides format support for EDA, 3D, 2D and Office document types in a single solution. It also bridges the gap between MCAD and EDA, with unique electro-mechanical digital mockup capabilities.
